

savings
dealerBest

dealerBest is a concept based on different services exclusively designed for the automobile industries.

We collaborate effectively and hand in hand with our clients, resulting in important profits in every scenario we are requested to work at.

Our area of savings is the most profitable one in the short term and it integrates like no other area the know-how from other industries to ours.

Furthermore, there are no costs involved for the client. **Can we ask more?**

We rely on knowledgeable experts for every area where you can save costs: **Energy and power, general and facility services, administration and taxes.**

We know very well the expenses structure in the automobile industry business. That is why our resources add value from the very first time they are hired.

We can recognize in the first visit any chances for you to save money and we start working on it from the very first minute.

Should we work together?

savings
dealer**Best**

Save money in general costs, so that you can focus on your business and respond effectively to market changes.

1. Philosophy

2. Target group

3. Services

1. Philosophy

How do we buy the power we are consuming?

What are the costs of electricity when there is nobody at work?

Can we save money in the way we deal with our documents?

Are the car taxes we pay suitable for lower taxations?

Can an international facility services company be a resource for my business?

Do we have time to control the small and common purchases, which result in huge costs over the year?

Our business is conditioned by administrative processes which are absolutely laborious and complex.

The amount of taxes we are handling, bookkeeping concepts which mixes, and, of course, the relationships with the manufacturers and importers can consume our precious time.

Additionally, there might exist a lack of knowledge to negotiate external resources which means a great expense at the end of the day.

In **dealerBest**, we offer car dealers experienced and specialized savings experts for every area.

Every area is leaded by a person who has in depth knowledge of the distribution business. This means for you that you can save money from the first moment you contract the service.

We provide you with detailed reports, contracting options and final saving results for every expense.

2. Target group

Authorized dealers

Manufacturer's and importer's headquarters

Official garages and repair shops

After-sales services

3. Services

Savings in general services: power, telephone, cleaning, maintenance, administration, social security, general purchases and interests.

Specialized management of every outsourced service.

Our concept of a “Green Car Dealer”

Establish additional offices where car taxes are lower.
